

4302 Unit 1 Usability Testing Form

Instructions: Give each issue a grade on the 1–5 Likert scale by highlighting your score in red. Give reasons for your score in the **Comments** section, and provide a total score for the site in the last line of the table. Use the designation N/A (not applicable) for issues that do not apply. Finish with your recommended changes to the site. The Comments and Recommended Changes fields will expand as is required for your text. Save the file with your name, such as **Wood_Usability_Testing_Form** before submitting it to the Dropbox for grading.

Issue	Rating
The purpose of the site is made clear from the beginning	1 2 3 4 5
Comments: The bulk of the content was for the first assignment and thus would serve better on a separate page. However, the page would be quite bare if it was removed.	
Page Titles and Headings are used effectively	1 2 3 4 5
Comments: I don't see any problems.	
Readers are able scan the Web pages Quickly	1 2 3 4 5
Comments: No problems that I can see.	
Search capabilities are available on the website	1 2 3 4 5
Comments: N/A. Site isn't large enough to warrant a search bar.	
The site uses sound navigational principles	1 2 3 4 5
Comments: Navigation could use a little cleanup.	
Graphics are used effectively on the site	1 2 3 4 5
Comments: N/A. No graphics on homepage.	
The use of fonts is appropriate for the site	1 2 3 4 5
Comments: Ariel Black. Simple generic font.	
The content layout and organization are appropriate for the site	1 2 3 4 5
Comments: Some more appropriate tags and CSS could be used.	
The site load time is reasonable	1 2 3 4 5
Comments: None.	
The site follows appropriate design principles	1 2 3 4 5
Comments: No external style sheet, inline styles, and bad colour palette.	
Usability Score	29/50
Recommended Changes: Update html tagging and create external style. Choose a less intense colour palette.
